

2CU sofa bed

2CU sofa bed

my aim was to design a convertible sofa, that doesn't look like a regular convertible yet offers all features from the best convertibles:

- converts to a double bed
- comfortable as a sofa and as a bed
- spacious bedside lockers
- storage space for bedding
- made from natural materials
- easy to convert
- solid construction
- modern and timeless design

2CU

2CU sofa bed

convertible

I designed a system to convert the sofa in 2 steps to a full size bed:

1. pulling the seat forward
2. pushing the back down

solid construction

- all mechanical parts made of stainless steel
- fully integrated mechanical system
- sideboxes made of solid american walnut wood panel
- upholstery made of natural latex foam, wool batting and Hallingdal 65 fabric: 70% New Wool 30% Viscose

space for bedding

the bedding compartment between the connecting rods is accessible from behind the back or trough lifting the seat

2 side boxes

- for solid standing
- as armrest and tray
- as bedside lockers with integrated drawers with plenty of space
